

**HVLS FANS** Made in India

High Volume  
Low Speed

Energy Efficient  
Noiseless

**BREEZE AIR** MAKES YOU FEEL LIKE STANDING ON A SEA SHORE.

## What is HVLS fan

A high-volume low-speed (HVLS) fan is type of mechanical fan greater than 7 feet (2.1m) in diameter. HVLS fans move slowly and distribute large amount of air at low rotational speed. Hence the name...

## High Volume Low Speed Fans.

Evaporates moisture on human body, gives cooling effect hence increases work comfort which leads to **increased productivity & efficiency.**

In the air conditioned areas, It helps in **cutting down load on air conditioners.**

# Where HVLS fan

- Agricultural stock yard
- Government Godowns Cold rooms
- Animal and poultry farms
- Milk production centers
- Food production centers
- Large worship places
- Automotive Showrooms

- Factories • WareHouses
- Retails
- Gymnasiums • Airport
- Railway
- Events & Exhibition Hall

## Why HVLS fan

- **CAPEX** saving up to 50% for a new ventilation project.
- **OPEX** saving up to 85% due to low operating cost.
- **POWER CONSUMPTION** Max 1.5KW / Each fan. Which is lower than a Toaster.
- **NO NOISE** compared to conventional high speed Fans.
- 2 years Manufacturer **WARRANTY**.
- Adopted by technology giants.

## Technical Specifications:

Model	Size	No. of Blades	RPM	Motor KW
MG245	24'	5	55	1.5KW
MG205	20'	5	65	1.5KW
MG165	16'	5	75	0.75KW
MG125	12'	5	125	0.75KW
